Dear Mr de Winkel

We have tested your hydraulic teststand, model HT2000-1-E/1-S on one of ours A340-600 aircraft at the final assembly line in Toulouse.

After having done functional hydraulic tests like landing gear swing, we are pleased to confirm that this hydraulic teststand fully meets the specific test requirements for this aircraft and certainly for all the Airbus family.

People which have work with your unit was very pleased by ergonomics.
We trust to have informed you well.

Best regards,

Hervé GIRAUD
